

# Fish frying pan - oval Titanium Professional

629604

Made of cast aluminium, suitable for all heat sources except induction and even suitable for use in ovens (up to 250°C). Cast aluminium excels at conducting heat, the pan is quickly ready for use. The handle is made from 18/10 stainless steel and remains cool during use. The Whitford® Xylan non-stick coating has a high temperature resistance (up to 250°C). Adhesion of the non-stick coating is improved by a layer of titanium between the aluminium and the coating. This double-layer procedure improves the service life of the coating and provides additional scratch-resistance. Very easy to clean after use.
