High-quality backbar with low energy consumption

The BA is our range of high-quality backbars. It has been updated and now uses in average 59% less energy compared to the previous models from the same range. This backbar has ventilated cooling for a short pull-down time to ensure that you can keep up with customer demand for cold beverages. If you need to adjust the temperature this is easily done on the electronic thermostat. The backbar cooler is made of solid materials and has adjustable chrome shelves with closely-spaced wires, which gives you a high capacity and stability. Furthermore, it has self-closing aluminium sliding doors with double glazed tempered glass. This helps save energy, but it also means a great product visibility. The BA range is also available in a variant with hinged doors.
