HILMA CHAIR

CONTEMPORARY COLLECTION

Design David Ericsson 2019

HILMA is a modern interpretation of the classic bentwood chair.

Backrest in solid bent European beech combined with a frame of hand welded steel. The matte steel frame is shaped with curved elegance as an homage to the traditional Vienna café chair.
Seat of solid beech milled into a 3D shaped seat curve, a flirt to the early 1920's Gemla models.
HILMA is also offered with upholstered seat of hairlok and wool, dressed in vegetable tanned leather or textile.

The stackable HILMA is a most durable chair of high comfort, built to last for decades.
Though created to endure public interior with heavy wear, the lightness and elegance makes HILMA just as suitable for the private home.

HILMA is offered in different color versions and powder coated frame on request.

DIMENSIONS

Width:	52 cm
Height:	77 cm
Depth:	50 cm
Seat height:	45 cm
Seat depth:	40 cm
Weight:	4 kg
Volume 2Pc:	0,3 m^3

Swedish handcraft made to customer order in 8 weeks.
