BERN Folding chair

CLASSIC COLLECTION

Design Uno Åhrén 1930

BERN is one of the early classics by Gemla Fabriker. The folding chair was launched with great success at the World Exhibition in Stockholm 1930. BERN was designed by Swedish architect Uno Åhrén after a patented folding construction of C.A.Buffington.
The folding chair BERN is thanks to it's ingenious design as stable and comfortable as a regular chair. In folded position the chair is very compact, only 3 cm thin. This makes BERN to be a good alternative to the traditional stackable chair.
The strong laminated beech and steel makes BERN very suitable for environments of hard ware.

BERN is offered in different color combinations and with or without upholstered seat.

BERN can be complemented with wooden wall hooks for 2 or 4 chairs, and a steel trolley carrying 12 chairs.

Swedish handcraft made to customer order in 8 weeks.

DIMENSIONS

Width:	44 cm
Height:	82 cm
Depth:	50 /3 cm
Seat height:	44 cm
Weight:	4 kg
Volume Pc:	0,01 m^3
