SUNFEATHER TABLE

CLASSIC COLLECTION

Design Gemla

SUNFEATHER is a light and elegant table in solid beech.
The table is designed for both lounge and seating areas as well as a solitary side table.

Table SUNFEATHER was originally designed for the armchair with the same name, where to slightly lower table top height makes the table perfect for areas with low seating.

The light shelf underneath makes the table very suitable for public lounge or waiting room areas.

SUNFEATHER is offered in several different color versions.
