

Gas barbecue Atlanta

700105

The Atlanta has excellent cooking properties due to the optimal heat distribution and hot air circulation inside the burner enclosure. The high temperature sears meat evenly and quickly, reducing adhesion to the grid even when the grid hasn't been greased. The 3 separately adjustable transverse burners have thermocouple security and electronic ignition. The burner assembly is made entirely of stainless steel and the grids are removable for easy cleaning. The three burners also allow the surface to be divided in separate heat zones for simultaneous cooking of meat, vegetables & fish. The Atlanta has a completely black epoxy coated frame with four caster wheels and a secure gas bottle holder. Thanks to the deep gas bottle holder you can place the gas bottle safely under the barbecue. Griddle surface: 1100 x 500 mm.
