Statement

To Whom It May Concern,

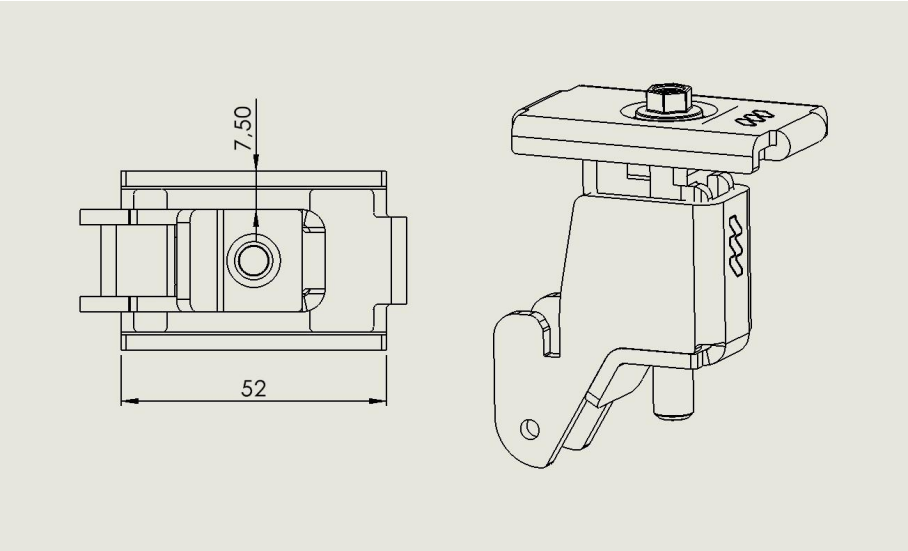

We, Leapton Solar（Changshu）Co Ltd, hereby confirm that our high quality solar modules complying with many international standards including IEC 61215 and IEC 61730 defining module requirements for terrestrial use. Please refer to Leapton Installation Manual for mounting methods that are currently approved.

We hereby confirm that the mounting configuration with NM Hyper Clamps is acceptable. The assembly design and the routines must comply with local electrical and building regulations. System designers and installers are solely responsible for load calculations and correct design of the support structure.

Furthermore module manufacturer will not be responsible for any defects due to the faulty construction, including the design of the clamp.
