

PRESS RELEASE

CES Innovation Awards®: Nuki Smart Lock Ultra wins prestigious distinction just days after launch

Graz (Austria), November 15, 2024

- **Just three days after the public launch: Austrian company named “CES Innovation Awards Honoree” for Smart Lock Ultra.**
- **Jury verdict: According to CES experts, “innovative design” and technical features guaranteed high results across all evaluation criteria.**
- **Global reach: The CES in Las Vegas is considered one of the world's most important trade fairs for technology and consumer electronics.**

Presented just a few days ago, the new Nuki Smart Lock Ultra is already a winner. Nuki Ultra is distinguished as a “CES Innovation Awards Honoree” in the “Smart Home” category. The jury described this latest innovation from the Austrian smart lock pioneer as follows: *"This product is characterized by innovative design and technical features that scored highly in all evaluation criteria."*

Honor and confirmation in equal measure

Nuki's innovation team intentionally invested four years in the development of the Smart Lock Ultra, aiming to take the smart lock technology to the next level. The result: the fastest, smallest, and most powerful smart lock ever developed by Nuki. Winning one of the world's most prestigious technology awards just three days after the product's launch is both an honor and a validation of this intensive development effort. CEO Martin Pansy expressed his excitement: *"What a week! We've only just launched the Smart Lock Ultra, and now it has already received one of the industry's most prestigious awards. That's incredible!"*

Focus on technology and design

The CES Innovation Awards® program is a competition held as part of the CES technology trade show. It recognizes consumer electronics products for their outstanding technology and design. CES, one of the world's largest and most important trade fairs for technology and consumer electronics, is held annually in early January in Las Vegas, USA. The 2025 edition will take place from January 7 to 10.
