PLANTAGEN®

Steel

It should be placed where hard objects are avoidable. Don’t move them too frequently. Place them on smooth surface to keep them stable.

In case of heavy fog or raining days, droplets on the steel product surface should be removed promptly with dry cotton cloth.

Acid and base can corrode steel products severely. In case steel products touch acid material or base (e.g. soap-suds, soda), wash it away with water and then wipe up the steel products with dry cotton cloth.
